Trey Price

Product Development and Applied AI

Boonville, MO · t.price1199@gmail.com

I build software with AI and design the workflows that support it. I've taken an app from prototype to the App Store, built a system that coordinates work across AI tools, and automated a football research and simulation pipeline.

Product and Software Experience

AI Development Workflow and My Desk

- Built a shared operating layer that gives configured AI tools the same product knowledge, decisions, and work instructions.
- Built My Desk to assign work and review results. A scheduled AI coordinator picks up scoped assignments, routes them to workers, and brings back results and verification.

DraftStakes CEO

- Built and shipped **DraftStakes**, a sports entertainment app centered on fantasy sports. Moved from Base44 to React, TypeScript, and Supabase to own the backend and support contests with distinct rules in a shared app.
- Designed and built **Clutch Drive**, a football franchise game with roster management, full-game simulation, and interactive play calling. Currently in invite-only gameplay testing.
- Designed and built **4th & Forever**, a swipe-controlled 3D football runner with timing-based tackles, progression, and seasonal leaderboards. Available in DraftStakes Arcade.

Football Research and Tracking

- Built a dashboard that pairs NFL projections from scheduled research and Python simulations with a personal ledger for tracking transactions, balances, and results.

Professional Experience

CoMo Electric

- **Plant Accountant** · Resolve cost and inventory discrepancies with field, warehouse, and engineering teams before closing construction work orders.
- **Warehouse Laborer** · Maintained inventory through chargeouts and returns, checked pick lists against construction plans, and billed materials to the correct accounts.
- **Fiber Optic Technician III** · Installed, spliced, and tested fiber lines. Worked with network operations to trace faults and revised field plans as needed to connect homes.

Human Intelligence Collector, U.S. Army

- Developed a physical training program and regularly led 25 people through it.
- Graduated from the Defense Language Institute's French program.
